

ServoPress Metal Formability Test System

from Interlaken Technology

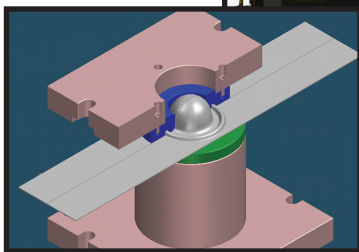

Interlaken's ServoPress Metal Formability Test Systems are designed to perform a variety of tests including: evaluating forming properties of materials, process development, quality control of incoming materials.

Some of the fixtures and dies sets that are available with the Interlaken ServoPress include:

- The Marciniak Cup
- Limited Dome Height (LDH)
- Draw Bead Simulator
- Olsen and Erichsen Cup
- Hydroforming & Warm Forming
- Bulge Test
- Engelhardt Test
- Bore Expansion Test
- Fukui Test & Forming Limit Curves

Control, monitor and record forming process parameters such as the clamp force, clamp position, punch force, and punch position.

High Temperature Options to 950 C
